Missouri Weekly Hay Summary

Farmers didn't find as many days suitable for field work as they would have liked this past week. Only a limited amount of field work was able to be accomplished before the rain came in. Fertilizer is being spread in some areas but fields are being chosen carefully. Although progress was rated in just single digits of the total crop, corn planting has started. Several farmers especially in the south are now turning out to grass as cattle have basically stopped eating much hay. Plenty of moisture around the state but some sun and warm would really get pastures growing good. The supply of hay is moderate and demand is light. Prices are steady. The Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or for a directory visit <http://mda.mo.gov/abd/haydirectory/> or for current listings of hay <http://agebb.missouri.edu/haylst/> (All prices f.o.b. and per ton unless specified and on most recent reported sales price listed as round bales based generally on 5x6 bales with weights of approximately 1200-1500 lbs).
